

ABSTRACT

Process and device for treating, especially for making up, for coloring or for the cosmetic care of some or all of the human or animal body

The process for treating, especially for caring for, making up or coloring, at least a part of the human or animal body, is carried out by applying at least two treatment products simultaneously to a localized area of said part of the body as a function of characteristics of the localized area and/or of a predetermined design, in order to obtain a mixture of said treatment products directly on the localized area, at least one treatment product comprising at least one solvent in a proportion of at least 10% by weight.
